

INTERNSHIP *for Students in Life Sciences, Engineering, Technical Medicine, Manufacturing Systems Engineering, Marketing, IT*

ABOUT *the opportunity:*

Innovation is key for Roche and our clients. Through this internship initiative, we want to provide an opportunity for early-career talent to work on innovative ideas and experiment in a safe and supportive environment. Together with colleagues in Roche Diagnostics Baltics, you will contribute to solving challenges in Science, Technology, Society and Sustainability.

The position will include an exclusive curriculum of on-the-job and off-the-job training, as well as sessions with Roche Diagnostics experts in the Baltics.

What's in it for you?

- ▶ An opportunity to work/ experiment on innovative ideas in a safe and supportive environment
- ▶ Insights into what a career at Roche could look like
- ▶ A fostering culture of curiosity, collaboration, and experimentation with an opportunity to solve real-world challenges and accelerate our 10-year ambition
- ▶ An environment where fresh ideas and knowledge from universities can be brought to life

What are we looking for?

- ▶ A final year Bachelor's or Master's student in Life Sciences, Engineering, Technical Medicine, Manufacturing Systems Engineering, Marketing, IT or similar field
- ▶ A curious mindset
- ▶ Strong collaboration and communication skills
- ▶ Analytical thinking and willingness to learn
- ▶ A highly motivated candidate wanting to make a difference in the lives of patients
- ▶ Strong interest in the pharmaceutical industry

Are you ready **TO APPLY?**

- ▶ The preferred starting date of the Internship is **May 2022**
- ▶ The internship lasts a minimum of **3 months**
- ▶ Interested applicants must send their CV and motivation letter to **baltics.hr@roche.com**
- ▶ Applications close on the **31st of March 2022**
